Victor Moreno

Teacher/Developer at Christopher Columbus High School

marjvic@gmail.com

Summary

My objective is to spend a lifetime of study in finance and software engineering. I bring as much of this knowledge as I can to the younger generations through my profession as a teacher. I keep up to date with web technologies for front end and back end programming: I have high proficiency in HTML5/CSS3, Javascript, Node.js, and database management under Mongo and MySQL. I also like to give back to the community by coaching kids on the Columbus High Robotics team.

Experience

Teacher/Developer at   Christopher Columbus High School

October 2013 - Present (1 year 8 months)

Develop apps to automate the workflow of teachers, streamline DB management across multiple platforms, administer a Windows server 2008-2012 fully virtualized IT infrastructure, and teach AP Computer Science.

Financial Representative at   Titan Risk Management - Affiliate of the Ark group

February 2013 - Present (2 years 4 months)

Finding ways to help clients accumulate wealth in a tax-efficient manner, protecting their insurability, plan their estates, plan for the cost of education, and plan for retirement. My job is to help people meet and exceed their financial goals in the fastest and most suitable way given their risk tolerance.

Finance Manager at   Belltrade Inc

September 2008 - January 2013 (4 years 5 months)

Helped design systems based on modern technology to enhance the functionality of an AS/400 legacy system. These systems included web-based reports which pulled data directly from the AS/400 database, data import interfaces, and enhancements to risk analysis processes.
